Investigation Title: Utilization of ERTS-A Data in Geological
Evaluation, Regional Planning, Forest Management, and
Water Management in North Carolina

Proposal No. 18

GSFC ID UN 281

Principal Investigator: Charles W. Welby

Date: September 1972

The objective of the contract is to demonstrate the usefulness
of ERTS-1 data to various state and local agencies.

The period 1 July to 30 August was spent coordinating the program
with the various state agencies and continuing contacts with key
personnel in various agencies.

During the September-October period the first images are expected;
and depending upon their quality, data analysis will begin. (The
first set was received 30 August but was of poor quality.)

At this point in time funds appear adequate to complete the
contract. Cooperating agencies have transferred funds into the
University's accounting system.

Since no images have been available during the July-August interval
no cost/benefit studies have been undertaken.

(E72-10167) UTILIZATION OF ERTS-1 DATA IN
GEOLOGICAL EVALUATION, REGIONAL PLANNING,
FOREST MANAGEMENT, AND WATER MANAGEMENT IN
